POWER WASHER

COLD WATER - GAS ENGINE, PORTABLE

CPD
SERIES

■ **Stainless Steel Construction:**

Heavy duty frame and base plate is made of rust proof stainless steel for a life time of corrosion resistance even in the harshest environments and is designed to absorb engine vibrations and keep your power washer in its place.

■ **Gasoline Engine:**

Industrial/commercial engines provide cleaning power right where you need it, without the need for electricity.

■ **Industrial Duty Pump:**

Direct drive, oil bath crankcase, triplex, ceramic plunger pumps. These heavy duty pumps are rated above required output to outperform axial and wobble plate pumps for long life.

■ **Replaceable Unloader:**

The unloader is not molded to the pump head allowing for easy maintenance or replacement. The unloader has an external bypass loop to keep the pump running cool. Cat Pump model has chemical injection and uses an integrated unloader.

■ **Dolly Style Frame:**

The dolly style frame is ergonomically designed with an ideal height and balance to reduce fatigue and back pain. Transportation and lifting is easy and the small footprint leaves plenty of room for your other tools.

■ **Integrated Wheel Kit:**

Large tires, paired with a tilt back style frame, allow for easy portability, even going up and down stairs, so you will have cleaning power right where you need it.

■ **Hose Reel:**

All CPD Series pressure washers include a rustproof, stainless steel hose reel making it quick and easy to manage up to 100' of hose and allow the capability of adding an optional drain jetter kit at minimal cost.

■ **More Standard Features:**

- 50' of high pressure hose with wand and trigger gun
- Nozzle set with insulated quick couplers
- Twist couplers between the hose and gun for quick switching between the wand or jetter hose option (when equipped)

■ **Dual Purpose Design:**

Easy to switch between pressure washing and spot free rinse on DI model or quickly remove optional drain jetter hose for pressure washing. It's like getting two machines in one.

■ **DI Spot Free (Models ending in -DI):**

The Hydro Tek spot free washers include built-in housings for the DI filters to make it more compact and portable than others on the market. A stainless steel cage frame encloses and protects the filter housings, pump, and motor. Simply insert a Hydro Tek filter pack to remove the impurities from tap water for a spot free finish without having to dry the surface. Quick read meter monitors the water quality to let you know when it is time to change the filters. System designed to conserve water flow and increase filter life.

The Hydro Tek Spot Free Advantage...

- Compact integrated filter housing
- On-demand DI water: no more bottle leases, bulky bottle storage, or running out of pre-purchased DI water
- Ideal for auto, RV, boat, bus, truck, or window washing.
- Hydro Tek DI filter packs have a high yield and produce ultra pure water. (Treats up to 1000 gallons to better than 5ppm purity in average tests)

DI model
